SOURCE OF

With a minimum carbon footprint, Mia Air is energy efficient and environmentally friendly. Thanks to its anti-allergenic structure, it delivers fresh air at a maximum level. Mia Air is CE, ECARF, Energy Star and UL CAS certified, is designed for safety of all age groups and has a fireproof ABS body structure.

Sometimes What You Can't See, Can Do the Biggest Harm to You

With more than 30 years of air filtration experience, **Mia Air** offers you the latest filtration technology. Mia Air has been designed to provide fresh clean air by trapping 99.99% of ultra-fine particles in the air. By using HEPA filtration, which traps extremely small particles, Mia Air can transform polluted air into clean air in seconds.

By capturing chemical pollutants (VOCs) in the air with the world's leading activated carbon filter, Mia Air traps chemical pollutants and greatly reduces the risk of developing health problems caused by air pollution. The 'Best in Class' **Mia Air Product Family** HEPA and activated carbon filters not only supply highly efficient filtration but also long-lasting service life.

"Your Air" is Under Control with Mia Air Mobile App

Mia Air's practical panel design, allows you to control the environment of both you and your loved ones in a simple way both manually and with the mobile app.

Mia Air Mobile App is an all-in-one screen design, providing instant information on ambient air quality and filter life, and provides access to all parameters related to the device. When it is time change the filter, the mobile application allows online ordering with an automated reminder.

Improve Your Air Quality

- Traps ≥99.99% of Pollutants in the Air (HEPA Filtration Technology)
- **ANTIMIC®** Coated **HEPA** Filters
- ((a)) PM1, PM 2.5, CO₂, VOC, Humidity and Temperature Sensors
- **Easy Movement** with Hidden Casters
- Effective Againts Viruses with **UVC Light**
- Control with
 Mia Air Mobile Application
- **5 Different** Modes
- The Advanced Touchscreen
- Effective Against Allergens
- **Environmentally** Friendly
- User Friendly
- 2 Years Warranty
- © CE, ECARF, Energy Star and UL CAS Certified

Deactivation ratio of microorganisms within the 1st hour of contact 99.98%* with ANTIMIC® coated HEPA filters.

*AATCC Test Method 100-2004, % reduction of Legionella Pneumophila, Sabancı University, 2012

Source of Clean Air for Larger Areas

Mia Air Tower has been designed to provide fresh clean air by trapping 99.9995% of ultra-fine particles in the air. It has $27~\text{m}^2$ filtration area and $300~\text{m}^2$ effective room coverage. By using ULPA filtration, which traps extremely small particles, Mia Air Tower can transform polluted air into clean air in seconds.

One of the best ways to improve your air quality is CE Certified Mia Air Compact. By using HEPA filtration, Mia Air Compact traps 99,99% of pollutants in the air. Thanks to light structure, it is transported easily.

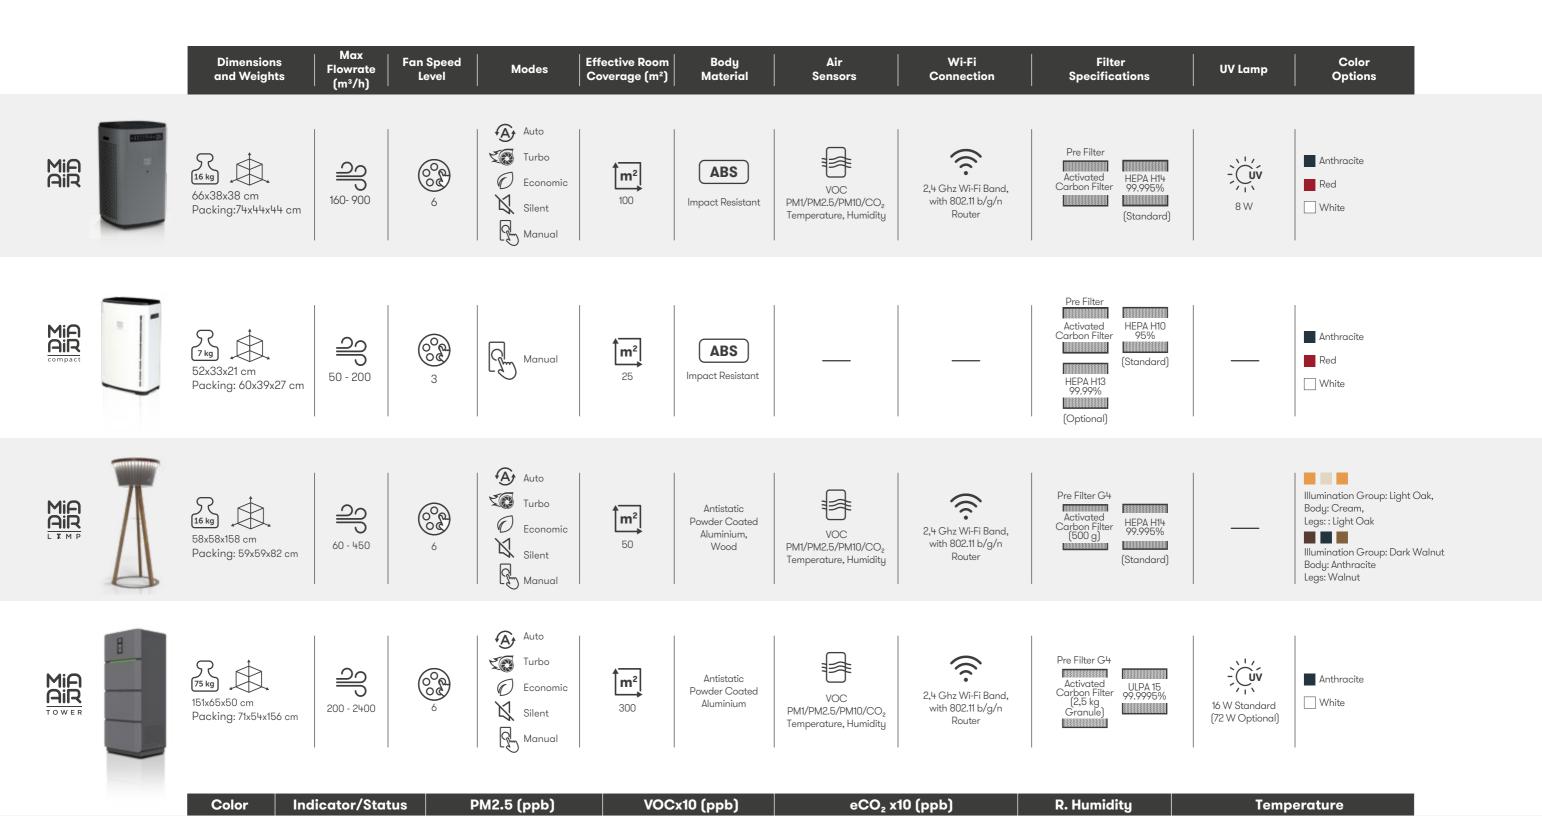

It Lightens Your Environment, while Purifying Your Air

Mia Air Lamp is used to provide air that has been purified of dust, particles and disturbing smells and for lighting. It can be used in all environments in which healthy air is required such as hospitals, workplaces, homes, schools etc.

We spend the most of our lives indoors. Indoor air quality is more polluted than outdoors and pollution affects our physical and mental health negatively. We can control our quality of air we breathe with Mia Air IQ.
